

CUSTOM SELECT™ ONE-OF-A-KIND MULTI-CORE CABLES

Custom Select™ is Clark's unique manufacturing service for producing custom multi-core hybrid cables. When standard items are not commercially available, Custom Select delivers customized cable and interconnect solutions. Each Custom Select cable is individually designed and manufactured to user specifications for element types, overall shield and tape, colors, master jacket and print legend.

Cable Element Options

- Audio Cables
- 110Ω AES/EBU Digital Audio
- Multi-Conductor Control
- Category 5E & 6
- Low-Skew UTP
- HD/SDI Coax
- Optical Fiber
- (other cable elements also available)

Overall Shield/Tape Options

- Foil Shield** - provides 100% coverage for additional overall RF/EMI rejection
- Braid Shield** - low DCR, improved LF rejection, flexibility and flex-life
- Water Blocking Tape** - moisture absorbing barrier for direct burial applications
- Binder Tape** - used for binding core elements without a master jacket- economical and maintains UL listing of core elements

Master Jacket Options

- TPE Elastomer** - rugged, flexible and abrasion resistant- ideal for portable indoor or outdoor applications
- Ultra-Flexible Matte PVC** - exceptional flexibility with a matte cosmetic finish
- PVC** - low-friction surface, easy-to-Install
- Polyurethane** - Ultra-rugged, flexible and puncture resistant
- Polyethylene** - puncture resistant, rigid and suitable for direct burial applications

Print Legend Options

Outer markings on the master jacket that provide identification, cable construction and branding information.
